

# **Properties of small molecules: bridging surface science and vacuum technology**

**Prof. Katsuyuki Fukutani**  
**(University of Tokyo)**

Course description:

Understanding the interaction of molecules with surfaces is of fundamental importance for molecular processes at surfaces and vacuum technology. This course is designed for scientists, engineers, and students who would like to know the basic concepts of molecule interaction with surfaces and the behavior of small molecules at surfaces such as hydrogen, oxygen, water among others.

Duration: half day
